

How engines work

Match the beginning of the sentence to the end

1	Steam	attached to the axle drives the governor
2	The piston	is attached to the crank
3	The piston	turns the flywheel which is on the axle
4	The connecting rod	converts the vertical movement to a rotary motion
5	The crank	is fed in to the cylinder
6	This crank	is attached to the connecting rod
7	The flywheel	regulates the speed
8	A belt	is forced up and down
9	The governor	rotates and keeps the momentum going

Write out how an engine works. Choose from the words below to help show the order.

- First
- Then
- After this
- And
- And then
- Finally
